

Professor, Takara Kaoru
DPRI, E-UE, G-EM
Disaster Management Tech. Policy,
Hydrology, Dr. Eng. (Kyoto University)

Subject: Request for Masters/Ph.D. position.

Honorable Sir,

I hope you are well. I have been informed about you from the university website.

I, the undersigned, nationality Bangladesh have the honor to send you my up-to-date CV for exploring the possibility of securing a Master/Ph.D. position to work in your research group at the Global COE program at Kyoto University. I hope that you have an opening in your research laboratory to give me an opportunity to learn more on Disaster Management.

I have finished my **B.Sc.Hons and M.Sc. degree in Geology & Mining** from Rajshahi University, Bangladesh having all through 1st class results. The medium of instruction was English through my study. I awarded Academic **Gold Medal** from Rajshahi University for obtaining good results in B.Sc in Geology and mining. I have done a thesis on “STUDY OF GROUNDWATER QUALITY IN SHAILAKUPA UPAZILA, JHENAIDAH, BANGLADESH”. I have done some research work on hydrogeology and disaster management which is published in national and international journals.

At present, I am teaching in the Dept. of Disaster Resilience and Engineering, Faculty of Disaster Management, Patuakhali Science and Technology University, Bangladesh. I have taught *Fundamentals of Hydrology, Credit hour: 2, Fundamentals of Hydrology (Practical) Credit Hour: 1, Introduction to Hazard risk and disaster, Credit hour:2, Introduction to Earth Science Credit hour:2, Indigenous Knowledge for Disaster Management, Credit hour:2, Disaster Risk Management in Business Sector, Credit Hour:2, Disaster Risk Management in Tourism Sector Credit Hours: 2, and so on.* Recently, I conducted a research project involving the Assessment of drinking water-related Arsenic and Salinity hazards in the Patuakhali district, Bangladesh. I am interested to get an opportunity to do research on the Hydrological disaster and related field in your laboratory.

I have gone through your website. Your research group is working on the Hydrological disaster and you have a vast knowledge of disaster management using remote sensing. This research topic fits with my research interest and background. I have a keen interest to work under your supervision. I believe that if I get a chance to do research under your direct supervision I would be able to acquire more deep knowledge of Hydrological disasters and related fields.

Please find attached my curriculum vitae, statements regarding my research with details of references. I appreciate being considered for a research position in your laboratory. Please let me know if I can provide any additional information in support of my application. I look forward to hearing from you to discuss how I could contribute to your research group and its success. Thank you for reviewing my letter and my enclosed resume.

If you have an opening now or in the near future and if you find my candidature of any interest to you, please don't hesitate to help me. If nothing is available with you at present, then please recommend my candidature to someone who is looking for a person of my experience and qualification.

Thanking you for your cooperation.

Kind regards
